

STATE OF SOUTH AUSTRALIA.

REPORT

ON THE

LIVESTOCK STATISTICS FOR THE YEAR 1924,

BY

H. L. SEMMENS, Acting Government Statist.

(BULLETIN No. 9 OF 1925.)

STATE OF SOUTH AUSTRALIA.—REPORT ON THE LIVESTOCK STATISTICS FOR THE YEAR 1924.

FOR several years the statistical details relating to our flocks and herds have been collected for the year ended 30th June, but it having been decided that all Australian States should collect statistics in respect of livestock as at 31st December, the particulars for South Australia are now presented for the year ended 31st December, 1924.

The previous count having been taken as at 30th June, 1924, the present numbers are only six months later, but particulars of slaughtering, wool clip, lambing, &c., are for the full year 1924, the slaughtering and lambing overlapping the returns for the year ended 30th June, 1924.

Throughout this report the figures in parentheses are those for 1923-24, inserted for comparative purposes.

Cattle.—400,423 (413,272), decrease 12,849, or 3.11 per cent. This decrease is general throughout the whole State, and also as regards all classes of cattle. Although the number of cattle is lower than at the previous count it is still much higher than the normal number, and exceeds any year between 1893 and 1921. There is also the fact to be noted that more cattle and less sheep are being slaughtered, and that even though there is a decrease in the herds of cattle it is more than counterbalanced by the estimated increase in the sheep flocks to 30th June, 1925. Dairy cows, in milk, numbered 92,810 (93,073); dairy cows, dry, 40,809 (43,365); heifers, over one year of age, 29,788 (32,339); the total of dairying cattle being 163,407 (168,777); calves, under one year, 70,565 (74,987); and other cattle 166,451 (169,508). Of the 29,788 heifers, 11,785 were reported to be springing, and of the 166,451 other cattle, 83,239 were one year and under three years of age, and 83,212 over three years. The average daily number of cows being milked was advised as 90,992.

Horses.—255,022 (258,489), decrease 3,467, or 1.34 per cent. It is to be noted that there was a decrease of 1,905 in the number of foals dropped. The following are the numbers of horses under the various headings collected:—Under one year old (foals), 11,776; one year and under four years, fillies, 14,917; colts and geldings, 17,346; four years and over, stallions, 1,233; mares, 102,459; and geldings, 107,291.

Sheep.—6,359,240 (6,596,875), decrease 237,635. This decrease in the flocks does not mean that our sheep industry has had a set-back, for on the contrary it has made further progress. The figures as at 30th June, 1924, included the effective 1924 winter lambing to the time of tailing, and from that date to the 31st December there would be only a slight increase from the spring lambing, and the net imports, whereas on the other hand there would be six months slaughtering and mortality losses.

Allowing for the further slaughterings and mortality to the 30th June, 1925, and the winter lambing, it is estimated that there would be approximately 7,100,000 sheep in the State on the 30th June, 1925, an increase of 500,000 for the 12 months. The number of sheep has only been over 7,000,000 at three previous counts, *i.e.*, in 1890, 1891, and 1892.

This increase is the result of (1) a tendency to revert to grazing instead of wheatgrowing; (2) a net importation of 146,000 sheep from the other States, (3) splendid pastoral rains and a good lambing, (4) the repetition of the experience of the previous year in slaughtering—that is, a tendency to consume more cattle and less sheep—and (5) practically none slaughtered for export.

Regarding the numbers as at 31st December compared with the previous 30th June, the ewes increased from 2,975,240 to 3,179,314, which is another proof of the upbuilding of our flocks. The slaughterings, &c., as mentioned before, would account for the decrease in the number of lambs from 1,590,535 to 1,446,265, and other sheep from 2,031,000 to 1,733,661. Of the other sheep, 79,805 were classed as rams, and 1,653,856 as wethers.

Breeds of Sheep.—The numbers of the various breeds of sheep were collected for the first time, the following particulars being obtained. There were stated to be 5,607,944 pure-bred Merinos, 27,624 Corriedale, 4,245 Dorset Horn, 1,839 Lincoln, 2,061 Shropshire, 589 English Leicester, 246 Southdown, 215 Border Leicester, 207 Suffolk, 150 Hampshire Downs, 81 Romney Marsh, and 16,899 other pure bred, of which the breeds were not stated. In addition there were 442,637 classed as Merino comebacks, and 254,503 as crossbred. The Merino sheep represent 88 per cent. of the total flocks, Merino comebacks 7 per cent., other pure breeds 1 per cent., and crossbred 4 per cent.

Pigs.—80,988 (73,414), increase 7,574, or 10.32 per cent.

Goats.—7,461 (7,596), decrease 135. The Angora goats, mostly crossbred, numbered 1,674, but only very few are shorn, 310lbs. of mohair being all that was obtained.

Other Stock.—Camels 4,076 (3,207), mules 921 (810), donkeys 3,383 (3,360), and ostriches 534 (611).

Lambing.—2,600,089 (2,572,716) ewes were mated, and 1,623,945 (1,601,039) lambs were marked, the effective drop averaging 62.46 (62.23) per cent. These figures are naturally very much the same, both including the 1924 winter lambing, the former also including the 1924 spring lambing, while the latter also included the 1923 spring lambing.

Particulars were collected of the number of ewes mated or intended to be mated for the 1925 lambing, and in a number of cases the markings were also obtained, and it is estimated that 2,700,000 ewes were mated, the markings averaging 62 per cent., representing 1,674,000 lambs. The outside pastoral districts probably averaged 65 per cent., the North-Western portion being particularly good, with 80 per cent., but in the North-Eastern it was barely 50 per cent. Within counties the average is estimated to be 60 per cent.; the Western and Upper North Divisions not being so good as usual.

Slaughterings.—There is an unavoidable overlapping of six months in the slaughterings for the years ended 30th June and 31st December, 1924. The following table gives the details:—

Year.	Sheep and Lambs.	Cattle.	Pigs.
1921-22	1,208,347	95,323	102,854
1922-23	1,290,669	127,294	118,765
1923-24	956,140	140,979	104,393
1924	933,426	155,050	102,089

There were only 13,079 sheep and lambs and 3,237 cattle slaughtered for export.

Milking Machines.—The use of machines for milking is being widely extended. Advices received indicate 369 being used, made up as follows:—118 milking 2 cows; 166, 3; 67, 4; 3, 5; and 15, 6.

Registration of Bulls.—Under the Dairy Cattle Improvement Act, 1921, there were 4,668 bulls registered during the year 1924-25 against 5,051 in 1923-24. The fees received during the year totalled £2,302, the amount at credit of the fund on 30th June, 1925, being £4,392.

Imports and Exports of Livestock (excluding Interstate trade by sea, no record).—The imports of sheep for year ended 30th June, 1925, exceeded the exports by 145,710, cattle by 40,849, and horses by 1,647. During the last five years the imports of sheep in excess of the exports have averaged annually 83,228, and cattle 31,606.

Wool Clip.—The particulars collected for the years ended 30th June and 31st December, 1924, would really represent two distinct clips, the former the 1923 and the latter the 1924, and hence are strictly comparable. 6,324,158 (5,972,911) sheep were reported as shorn, and the clip of wool obtained was 51,779,884 (49,964,235) lbs., averaging sheep and lambs 8.19 (8.37) lbs. per fleece, sheep 9.77 (9.58) lbs. and lambs 2.62 (2.74) lbs. Including the estimated wool on local skins exported 5,433,789 (6,540,826) lbs., and fellmongered 983,450 (1,093,022) lbs., the total production is estimated at 58,197,123 (57,578,083) lbs.

Market Prices of Stock.—Comparing the average market prices of stock for the calendar years 1923 and 1924, increases are noted as regards sheep and pigs, and decreases for cattle. The yearly averages of prime Merino wethers rose from £2 3s. 0d. to £2 11s. 3d.; ewes, £1 14s. 9d. to £2 1s. 6d.; lambs, £1 11s. 3d. to £1 16s. 9d.; baconers, £4 11s. 6d. to £5 1s. 0d.; and porkers, £3 0s. 3d. to £3 11s. 9d.; while prime bullocks fell from £16 17s. 6d. to £14 9s. 0d.; and cows, £10 9s. 0d. to £9 17s. 0d.

Oversea Exports.—The exports to oversea countries of pastoral and dairying products for the years 1924-25 and 1923-24 were valued at £6,090,371 (£5,623,559), the principal items being wool £5,070,164 (£4,644,686), skins and hides £716,456 (£624,417), butter £171,378 (£223,255), meats £45,669 (£62,834), tallow £65,219 (£40,723), and other £21,485 (£27,644).
